Individual
Assignment 25%

Assignment 2: Media Player in JavaFX

Objective

To design and implement a media player using JavaFX that supports:

- Playing audio/video files.
- Keyboard-based controls (play, pause, stop, next, previous, volume).
- A playlist feature where users can add or remove media files dynamically.
- To use keys on all controls

Instructions

Part A: Basic Media Player

1. Create a JavaFX application with a MediaView for video playback.
2. Load at least one media file (audio or video).
3. Implement basic controls:

- **Play**
- **Pause**
- **Stop**

Part B: Keyboard Controls

1. Map keys to player actions:

- **Spacebar** → Play/Pause toggle.
- **S** → Stop playback.
- **N** → Play next item in playlist.
- **P** → Play previous item in playlist.
- **Up Arrow** → Increase volume.
- **Down Arrow** → Decrease volume.
- **M** → Mute/unmute.

Part C: Playlist Management

1. Use a ListView to display the playlist.
2. Allow users to:
    - **Add files**: Use FileChooser to select media files and add them to the playlist.
    - **Remove files**: Select an item in the playlist and remove it.
3. Ensure the player automatically updates when a new file is selected.

Marking Criteria

Design & layout	20
Functionality	20
User Experience	10
Code quality	10
Playlist management	20
Student's own work	20
Total	**100**
